

Centreon EPP*

IT monitoring integration: from zero to infinite in seconds

*Enterprise Plugin Packs

No time to waste. The world is vast and you've got places to go. And so is your IT infrastructure, a world in perpetual expansion, with new sites to monitor every day. Centreon Enterprise Plugin Pack (EPP)

is the ace up your sleeve – whether you're deploying a monitoring solution from scratch or looking to add new assets to an existing monitoring plan. No fancy open source expertise necessary.

Integrate faster than you can say plugin

With Centreon Enterprise Plugin Packs you can deploy your monitoring program over hundreds of vendor domains (and still counting) for immediate, wide and deep monitoring reaching every nook and cranny

of your ITOM and ITSM ecosystem - from legacy to virtual. The more your company works with a diverse and expansive IT infrastructure, the more you stand to generate scale and cost savings.

- Vast library of Plugin Packs for your operating systems, virtual and physical servers, applications, software protocols and services to network equipment, databases and storage array
- Newly available monitoring indicators automatically show up
- Easily installed and managed via a web interface
- Regular enhancements and add-ons – enriched, tested and fixed with contributions from the open-source community
- On-premise coverage with preconfigured templates and scripts, hosts and services
- Advanced performance indicators
- Drill-down metrics – well beyond mere pings and alerts

Pretested and validated for reliable, instant use

Our experts test, validate and document Plugin Packs so you don't waste days or weeks in writing scripts to integrate a new asset or application to your monitoring regimen. Centreon EPP's turnkey plugins have got you covered.

Leave nothing out with Centreon EPP
